PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A possible military storage installation consisting of 33 storage buildings, most of which are between 150 and 250 feet in length, lies in a heavily wooded area 5 kilometers (km) south of Lvov and 1.5 km south of the city stadium (Figure 1). The installation (Figures 2 and 3), covering approximately 270 acres, contains a fenced storage area and a small support area. A probable POL storage tank is on the south-eastern edge of the installation.

A rail spur, presently under construction, will provide rail service from the main rail

line to Lvov to the eastern section of the storage installation. Good all-weather roads connect the installation to the city.

[redacted] cover the installation. Numerous new buildings have been added since the [redacted] photography but the poor quality of the earlier photography precludes an accurate count. It is not possible to identify the type of storage, but its location in a wooded area and its general appearance suggest a probable military function.

DESCRIPTION OF INSTALLATION

Railroad Service

A rail spur from Lvov is under construction into the area.

Road Service

Good all-weather roads connect the area to the city.

Administrative and Troop Housing Area

Area D contains one multistory barracks, eight single family quarters, nine duplex family

quarters, and one possible T-shaped administration building.

General Storage Area

Area E is fenced and contains 33 storage buildings, a majority of which are in heavy woods.

POL Storage Area

Area G contains a POL tank 65 feet in diameter.
